## SUMMARY

Highly motivated IT enthusiast specializing in full-stack web development with a strong passion for continuous learning and modern software engineering practices. A reliable collaborator who thrives in team environments, bringing an adaptable mindset to translating complex, real-world problems into intuitive digital solutions.

Seeking an entry-level developer or internship role to leverage a versatile technical toolkit and a disciplined approach to system development. Committed to contributing high-quality work, adapting quickly to production environments, and growing into a versatile software engineer who delivers clean, scalable code.

---

## EDUCATION AND QUALIFICATIONS

### Bachelor of Science in Information Technology

Aug 2023 - Present

University Of Cebu Lapu-lapu and Mandaue

- **Relevant Coursework:** Systems Analysis and Design, Database Management Systems, Web Development, and Software Engineering.
- **Key Projects:** Developed full-stack web and mobile applications including a real-time transit tracking system and automated 3D modeling solutions using modern frameworks.
- **Technical Skills Applied:** Hands-on experience with PHP (Laravel), MySQL, modern frontend tools (Tailwind CSS, React), Git version control, and cloud deployment platforms.
- **Academic Collaboration:** Collaborated effectively in agile team environments to design database schemas, build secure APIs, and deliver software projects on strict deadlines.

---

## TECHNICAL PROJECTS

### Pagkainang-Sambayanan | Full Stack Developer

- Built a Laravel and MySQL-based food donation platform featuring a disaster-aware "Emergency Mode" to streamline real-time relief distribution during crises.

### Cany | Full Stack Developer

- Developed a smart-scan grocery application that utilizes real-time item scanning to dynamically track and manage user budget expenses.

### Readerly | Full Stack Developer

- Developed an online reading coach web application designed to support and improve literacy skills for elementary students struggling with reading.

---

## TECHNICAL SKILLS

- **Frontend & UI/UX:** React, Tailwind CSS, JavaScript (ES6+), HTML5/CSS3, Figma Prototyping
- **Backend Development:** PHP (Laravel), Python (Django), Java (Spring Boot), MySQL, RESTful APIs
- **Tools & Deployment:** Git, GitHub, Docker, Supabase, Vercel, Firebase, Cloud Deployment
- **Methodologies:** Systems Analysis & Design, Agile/Scrum Collaboration, Problem-Solving.
